# NIDA INSTITUTE FOR BIBLICAL SCHOLARSHIP WILL MANAGE BIBLE ONLINE LEARNER

For 15 years the web application Bible Online Learner has been developed to enhance Biblical Hebrew language learning for many students in Denmark and globally. The two main designers of the software are Professor of Hebrew Bible and ICT Nicolai Winther-Nielsen and Civil engineer and programmer Claus Tøndering.

They are now ready to entrust their work in the care of the Nida Institute for Biblical Scholarship. Its director, Reinier de Blois, will organize its further development and broader use in Bible translation and theological education through funding from Every Tribe Every Nation
